

New Owner Access to Google Groups:

1. **Confirm you are using a gmail address** or set up a new gmail account. If you prefer not to have a gmail address, please follow the steps below to link your preferred email address to a Google Account (not a gmail address):
2. **Go to Google Account Creation:** Open your browser and go to accounts.google.com.
3. **Start Account Creation:** Click on **Create account** and choose **For my personal use**.
4. **Enter Basic Info:** Fill in your First and Last Name and click **Next**.
5. **Select Existing Email:** On the "Choose your username" screen, click the link that says **Use my existing email address instead**.
6. **Enter Your Email:** Type in your current, non-Gmail email address (e.g., your work or Outlook email).
7. **Verify Your Email:** Google will send a verification code to that email address. Enter the code in the Google sign-up form to confirm you own it.
8. **Set Password & Finish:** Create a strong password for your Google Account (don't use your existing email's password) and complete the remaining steps, including adding a phone number and agreeing to terms.
9. **Send your preferred email address to mhpv@gmail.com:** The address will be added to Merritt House Google Groups for Merritt House communications. You may receive an invite to accept for Merritt House Google Groups that will validate your preferred email address. Any issues, contact mhpv@gmail.com.
